

# Personal Calling Cards

Google the history of calling cards, it's quite interesting.

These cards are every thing you'd write on a napkin, without the napkin. Social situations require calling cards, not business cards.

We've all handed out business cards at the wrong time, doing this is a little tacky.

Handing out a personal card is a hit! Your friends will love them. We get the greatest responses with these cards. On them you put all your personal contact info, name, number, cell number, address, email, and whatever type of background you want, weather it's a picture of your house, cabin, dog, family. . . whatever makes it personal.

Cards are High gloss, and very stout. They have rounded corners or square, both sides printed, or plain on the back so they can write notes.

You get 1000 cards. and 2hrs free design time per set. No kidding, 2 hours free. This makes them very special. Cost is \$ 120.00 for a set. That includes shipping right to your door.

Call or visit [noboxgraphics.com](http://noboxgraphics.com), to order yours today.
